EDUCATION

University of Galway

B.Sc. Computer Science and Information Technology

Galway, Ireland

Sep 2023 – Jun 2027

Gaelcholáiste an Phiarsaigh

565 Points in Leaving Certificate

Dublin, Ireland

Sep 2017 – Jun 2023

WORK EXPERIENCE

IT Infrastructure Intern

EirGrid

Jan 2026 – Sep 2026

Dublin, Ireland

- Worked within a safety-critical national infrastructure environment, supporting data centre & hosting operations.
- Gained exposure to servers, virtualisation, networking, monitoring, and enterprise systems.
- Developed understanding of system reliability, change management, and operational risk in production environments.
- Collaborated with engineers across infrastructure and operations teams.

Supervisor (Promoted from Sales Assistant)

Petstop

Nov 2023 – Jan 2026

Dublin, Ireland

- Managed daily operations, trained staff, and handled high-pressure decision-making in one of Ireland's busiest retail stores.
- Developed strong communication and leadership skills transferable to technical team environments.

TECHNICAL PROJECTS

Final Year Project Thesis | *Industry Collaboration - EirGrid*

Sep 2026 – Present

- Analysing large-scale marine survey data to assess offshore suitability for turbine and cable placement.
- Working with bathymetric, geophysical, and topographic datasets representing seabed conditions.
- Applying data analysis and machine learning techniques to identify patterns and model seabed changes over time.
- Investigating reliability and uncertainty in model outputs for real-world decision making.

Shoot the Shapes | *Unity, C#*

Sep 2025 – Dec 2025

- Developed a 2D game in Unity using C#, implementing player controls, shooting mechanics, enemy behaviour, collision detection, and scoring.
- Designed and implemented game states, UI elements, and progression mechanics to create a complete playable experience.
- Applied object-oriented programming principles to structure game entities and reusable gameplay components.

Winterbourne Consulting | *Web Development & IT Infrastructure*

Jun 2026 – Sep 2026

- Designed and developed a responsive company website, from initial design through to deployment and configuration.
- Designed the company's logo and visual identity to establish a consistent professional brand.
- Configured the company domain, DNS, and Microsoft 365 email infrastructure.

Matrix Transformation Visualiser | *Java, Swing*

Mar 2025 – Apr 2025

- Developed a Java application for visualising 2D matrix transformations and their effects on geometric objects.
- Implemented matrix operations including translation, rotation, scaling, and reflection using linear algebra principles.
- Built a Swing-based interface allowing users to interactively modify transformation matrices and visualise the resulting changes.

TECHNICAL SKILLS

Languages: Java, Python, C, C#, JavaScript, HTML/CSS, R, SQL

Frameworks: React, Node.js, Spring Boot, Bootstrap

Developer Tools: Git, Google Cloud Platform, JUnit, GitHub Actions

Libraries & Platforms: pandas, NumPy, Matplotlib, Unity, Firebase

Achievements: 7th Place (of 400+) in ZeroDays CTF, Selected for EirGrid Industry Collaboration Project
